

I live in Oklahoma, so I cannot make the GigaByte march tomorrow. But I'm a Republican that thinks that the FCC has ruined technology related to the Internet. I must urge you to shed the lobbyists from BellSouth, Verizon, and other major technology companies and start listening to the American people. If you regulate CLECs and smaller ISP's any further, you will crush all competition in today's IT industry. I must ask you to stop and think about everyone.
